FDM 400mc

Real Flexible
Flexible, fast, predictable, and simple to operate. Manufacture Real Parts™ in a wide range of thermoplastics.

The FDM 400mc™ from Stratasys allows you to manufacture Real Parts in-house with multiple production-grade thermoplastics, such as ABS-M30, PC, PPSF and PC-ABS blend. FDM 400mc is a user configurable high-performance workhorse, ideal for creating Real Parts for conceptual prototypes through direct digital manufacturing.

FDM 400mc coupled with powerful Insight™ front-end processing software gives you the ability to quickly manufacture parts in a variety of materials that match your mechanical properties, aesthetics and resolution needs. With the FDM 400mc, you can accurately manufacture Real Parts with complex geometries, that are strong enough not only for functional testing, but end use as well.

| **Build Envelope & Material Delivery Options** | **Network Communication**  
Base System –  
- Maximum part size is 14 x 10 x 10 inches (355 x 254 x 254 mm)  
- One (1) auto load canister with 92 cubic inches (1508 cubic cm) modeling material  
- One (1) auto load canister with 92 cubic inches (1508 cubic cm) support material  
Optional Envelope/Material Canister Upgrade  
- Maximum part size is 16 x 14 x 16 inches (406 x 355 x 406mm)  
- Two (2) autoload canister with 92 cubic inches (1508 cubic cm) modeling material  
- Two (2) autoload canister with 92 cubic inches (1508 cubic cm) support material | 10/100 base T connection. Ethernet protocol  
Software  
FDM 400mc uses Insight™ software to import STL files which automatically slices the file, generates the necessary support structures and material extrusion paths or allows user to manually manipulate any of the model/support structures and/or toolpaths.  
Operator Attendance  
Limited attendance for job start and stop required.  
Operating Environment  
Maximum room temperature of 85°F (29.4°C). Maximum room dew point of 78°F (25.6°C).  
Power Requirements  
230 VAC, 50/60 Hz, 3 phase, 16A/phase (20 amp dedicated circuit required)  
System Size  
50.45 inches wide x 35.25 inches deep x 77.25 inches high (1281 mm wide x 895.35 mm deep x 1962 mm high).  
Regulatory Compliance  
CE |
| **Modeling Material Packages** |  
System is capable of manufacturing parts in any combination of the following Material Options. Choose any one or combination of the Modeling Material Packages listed below.
